A Passionate and Solution driven **Software developer** with **1.5+ years** of hands-on experience in creating and maintaining responsive, user-friendly, and scalable **Web** and **Mobile App** using latest technologies. Talented with a strong ability to produce clean and reusable code and work well with others. With keen interest in Design Aesthetics I am dedicated in making picture-perfect UI with increased Performance and best user experience.

Work Experience

Software Developer
Creware Technologies | Bangalore, India

March 2023 - Present

Optra App - Institution/Student management app

- Application that helps track the overall performance of a student. Ensuring that all necessary information is exchanged, and the student is effectively tracked Performed by acting as the third eye and keeping a close watch.
- Login and update the attendance, marks, assignment questions etc. Also, they can give their reviews and remarks for the same. Additional features also allow them to track and maintain various events conducted in the institution.
- Developed and created various Mobile features like QR camera, and permissions access, push notifications, animations etc using React Native, TypeScript and Redux.
- Work in close conjunction with backend developers to discuss and maintain data structure for efficient integration from frontend side.
- Fix UI and Performance issues in existing implementation.
- Upgrading Android sdk versions, BuildTools, and setting configurations and publishing app in Google playstore.
- Actively participated in discussions with clients to define new features, functionalities, and improvements, contributing valuable insights to project planning.

Lagna Cards - E-commerce application

- Ecommerce web app that sells wedding cards and other invitation cards. The employees and admins can login to the Admin portal and maintain the products, employee details and other attributes. The Clients portal is a e-commerce page where the client can register/login, add wishlist, compare and purchase the items.
- Developed and Build Client and Admin side of an Ecommerce App using, ES6 JavaScript, NodeJs, and ReactJS.
- Developed Re-usable components and managed state using Redux.
- Develop and manage server-side components.
- API integration by AJAX calls and performs CRUD operations on JSON data, images, and videos of Products.
- Identify and implement data storage solutions.
- Improving and Suggesting Design Changes made by UI designers for better Performance and functionality.

Junior Software Developer
StayinFront | Chennai, India

January 2023 - March 2023

- Development of Frontend of a Distribution Management System (DMS) Application Using ES6 JavaScript, React and Redux.
- Integrating Frontend and Backend using AJAX calls and requesting JSON through REST APIs.
- Designed, Developed, and improved an existing older application design. Improved responsiveness in mobile devices. Worked in Agile methodology in close conjunction with backend devs to deliver better applications in a 6-member team.

Skills

- JavaScript (ES6) Typescript
- Redux , Redux Toolkit
- React JS, React Native
- HTML , CSS , Bootstrap
- Mongo DB, Node Js ,ExpressJS
- Github GitLab

Expertise

- Planning and time management
- Collaboration & Teamwork
- Leadership
- Flexible ,Adaptable & eager to learn
- Creative Problem Solver
- Analytical
- Keen understanding in responsive Design Priciples

Education

B.Tech
APJ Abdul Kalam Technological University
2017-2021

Higher secondary
CBSE
2015-2017
